DETAILED ACTION

Allowable Subject Matter

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for limiting the use of a device. Each of the independent claims identify the uniquely distinct features of "broadcasting a wireless control message within a broadcast range established by a controlling system, wherein the control message includes an instruction to limit operation of one or more components within the electronic device and responsive to the instruction, setting one or more electronic gates implemented as hardware in the device that control operation of the one or more components". The closest prior art, Chymaytelli (US 20020142762), discloses a system for instructing a wireless device to disable an application program, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
